## **INTRODUCTION**

Transpace is pleased to present results for the 2018 financial year reflecting a 13,3% increase in headline earnings per share. Operating profit grew by 14,4% notwithstanding challenging trading conditions including selling price deflation, reduced customer spend and continued stagnant demand for recycled material.

This increase resulted from stringent cost control, aggressive sales and marketing and sound working capital management, further translating into operating margin increasing to 8,1% (June 2017: 7,4%).

On 1 March 2018, Transpaco acquired the Future Packaging group of companies which operates across South Africa in the packaging and related products market. Future Packaging distributes its products nationally through dedicated branches in Johannesburg, Durban, Cape Town and Bloemfontein. The acquisition will enable Transpaco's existing distribution arm, Transpaco Packaging to expand its product range and geographical footprint. Transpaco welcomes Claus Hennings, the managing director and vendor of Future Packaging to Transpaco. We look forward to his and the company's positive contributions to group profits in the future.

Although the acquisition of Future Packaging contributed towards group operating profit, the benefit was offset against non-recurring transactional costs expensed during the year.

The anti-plastic debate continues and in particular the adverse sentiment towards retail plastic bags. While Transpaco is active in this market, our diversification strategy has reduced the group's dependency on retail plastic bags. Transpaco, through its recycling division, remains South Africa's largest recycler of post-consumer polyethylene.

Transpace is working with government, industry bodies and customers to explore suitable solutions and mitigate against any possible negative consequences. Further, we are investigating expanding into several alternative products as a substitute for retail plastic bags.

Notwithstanding the decrease in turnover in the Plastic division primarily due to price deflation, operating profits increased in all three divisions

The weighted average number of shares in issue in calculating EPS and HEPS was 32 629 000 (June 2017: 32 858 000). In total, 431 123 shares held for the Transpaco share incentive scheme were cancelled during the period. Transpaco no longer allocates shares for this purpose which has been replaced by a cash incentive bonus scheme

Cash generated from operations decreased to R125,7 million (June 2017: R204,4 million). Cash and cash equivalents at year-end were R60, 4 million (June 2017: R99, 5million). Efficient working capital management minimised net interest paid and resulted in Transpaco's net interest-bearing debt-to-equity position being restricted to 11,6% (June 2017: net cash positive) while maintaining a robust balance sheet. The purchase consideration for the Future Packaging acquisition was funded by Transpaco's existing cash resources. Due to the seasonal nature of Transpaco trading profile, additional funds were required for working capital funding. The company selected long term finance due to favourable lending rates

#### PROSPECTS

The group will continue its proven business strategy, targeting organic growth while maintaining strict financial control and at the same time identifying and pursuing appropriate acquisitions
