Transoaco
SPECIALISED FILMS

ABOUT US

1.

Transpaco is a leading plastic and packaging manufacturer, focused on sustainable growth activities, satisfying the needs of its customers, shareholders and employees. Transpaco is committed to the protection of the environment and dedicated to the conversion and re-use of natural resources.

Transpaco Specialised Films (Pty) Ltd is a world class manufacturing facility located at 180 Barbara Road, Elandsfontein, Germiston, Gauteng, South Africa and is a wholly owned subsidiary of Transpaco Limited.

The company was established in 2004 specialising in the production of stretch film to supplement the then existing four Group Companies.

Transpaco Specialised Films has enjoyed noteworthy organic growth since its inception through improvement and the correct capital utilization of new technology. We currently have three Docli (Amut®) cast film extruders installed and also the latest 57 Nano layer cast machine, a first of its kind in South Africa from Colines® Italy.

The market is extremely diverse as it includes any product that is palletised either by hand or machine and making use of pallet wrap makes it the most cost effective way for most of our customer to stabilise a product on a pallet.

Currently Transpaco Specialised Films (Pty) Ltd is

ISO 22000:2018 Certified

MARKETS WE SERVE

2.

- Food Manufacturing
- Transport & Logistics
- Warehousing
- Distribution
- Milling
- Distillers

PRODUCT RANGE

3.

NANO TECHNOLOGY

- Increase containment force
- Higher stretch
- Superior puncture and tear resistance
- Ideal for high speed machines
- Environmentally friendly due to lower usage per a pallet and is 100% recyclable

NANO57 MACHINE ROLLS

The most advanced stretch film available for high speed automated wrapping systems

HIGH PERFORMANCE MACHINE ROLLS

A sustainable pallet stabilisation offering consistent high performance with excellent stretch memory

+ THIRTY MACHINE ROLLS

An environmentally friendly roll developed to include 30% post-consumer recycled plastic

UTILITY WRAP MACHINE ROLLS

A value for money wrapping solution for heavier loads

ECONOWRAP MACHINE ROLLS

Cost effective pallet stabilisation for lighter loads

PRODUCT RANGE

4.

SEVEN LAYER CAST FILM

- Lower yield point means easier to pull (stretch)
- High stretch rate ie 1 meter to 2.5 meter (150%)more
- Consistent cling leaving no sticky residue and pallets don't stick together
- Cast film does not telescope
- Low noise levels
- Superior clarity (barcodes can be scanned thru the plastic)
- Environmentally Friendly as cast film is 100% recyclable

ECONOWRAP HANDROLLS

Our most popular hand wrapping solution available in extended core only

UTILITY WRAP HANDROLLS

An extensive range of widths and micron providing a customised wrapping solution

HIGH PERFORMANCE HANDWRAP

For demanding pallet stabilisation standards able to withstand asymmetrical loads

MINI ROLLS

100mm wide rolls used for picture frames and other specialized wrapping applications
